THE MAIN ASPECTS OF THE DEVELOPMENT OF FOREIGN ECONOMIC ACTIVITY IN THE ERA OF GLOBALIZATION

Abstract. The article deals with the issues of the state's inclusion in the global economic processes, which have become a necessary condition for the national development of each country seeking for the efficiency and competitiveness of its economy. The importance of the position of the Republic of Kazakhstan and the regions as full subjects of international economic relations (IEA), describes the economic relations with many developed and developing countries, expanding the range of partner countries. The article deals with the main factors of development of foreign Economic relations and their impact on the regional economy. The main stages of fruitful state policy in the field of foreign Economic activity (FEA) are characterized, and the basic structure of FEA of the Republic of Kazakhstan is described. There is a deepening of trade and economic relations with them, moving towards integration into the world market.

Key words: globalization, economic processes, foreign economic activity, economic relations.

Introduction. President N. A. Nazarbayev, in the strategy "Kazakhstan-2050: a new political course of the established state" and in his annual address to the people "NURLY ZHOL – the WAY to the FUTURE", noted: "The global system of the world economy is a well-established mechanism that works according to its own rules [1]. According to these rules, we must work. We are not expected in the world markets, but we need to become popular and gain a foothold in them." To do this, it is necessary to create an innovation-oriented national economy, the level of openness of which should promote the attraction of new industrial and information technologies, the development of the export potential of the country and the provision of personnel trained at the level of international standards, etc. [2]. This is possible only if we conduct our foreign economic activity (FEA) efficiently, especially in the context of globalization. The relevance of foreign economic processes that contribute to the sustainability of the national economy (NE) significantly increased in the global economic crisis [3].

Methodology. General methods of research of the study were used In the process: methods of analysis of financial statements: horizontal, vertical, ratio, comparison, and other.

The following methods were used to study the foreign economic activity of the Republic of Kazakhstan and its regions:

- review of the regulatory framework;
- analytical method;
- studying of foreign experience;
- the possibility of application of instruments of state - private partnership;
- collection and processing of statistics;
- economic-mathematical calculations.

World practice knows more than twenty main forms of economic cooperation, which can be combined into five groups: 1) trade, 2) industrial, 3) scientific and technical, 4) financial and 5) cultural. Each form has its own economic and organizational features, the skillful use of which can guarantee the greatest impact in specific situations [5].

The most common forms of foreign trade in the Republic of Kazakhstan, with their brief characteristics, are shown in the table [6].

Exports to the Russian Federation in January-March 2018 amounted to 1 170.9 million US dollars (compared to January-March 2017, more by 7.3%), imports – 2 684.8 million us dollars (8.7% more).

Exports to the Republic of Belarus in January-March 2018 amounted to 23.0 million us dollars (compared to January-March 2017, less by 22.1%), imports – 123.4 million us dollars (32.7% more) [14].

Exports to the Republic of Armenia in January-March 2018 amounted to 2.5 million US dollars (compared to January-March 2017, 8.0 times more), imports – 1.7 million us dollars (compared to January-March 2017, 1.8 times more) (The Committee on statistics, 2018) [15].

In particular, translations into English of papers already published in another language are not accepted.

No other forms of scientific misconduct are allowed, such as plagiarism, falsification, fraudulent data, incorrect interpretation of other works, incorrect citations, etc. The National Academy of Sciences of the Republic of Kazakhstan follows the Code of Conduct of the Committee on Publication Ethics (COPE), and follows the COPE Flowcharts for Resolving Cases of Suspected Misconduct (http://publicationethics.org/files/u2/New_Code.pdf). The authors are obliged to participate in peer review process and be ready to provide corrections, clarifications, retractions and apologies when needed. All authors of a paper should have significantly contributed to the research.

The reviewers should provide objective judgments and should point out relevant published works which are not yet cited. Reviewed articles should be treated confidentially. The reviewers will be chosen in such a way that there is no conflict of interests with respect to the research, the authors and/or the research funders.

The editors have complete responsibility and authority to reject or accept a paper, and they will only accept a paper when reasonably certain. They will preserve anonymity of reviewers and promote publication of corrections, clarifications, retractions and apologies when needed. The acceptance of a paper automatically implies the copyright transfer to the National Academy of Sciences of the Republic of Kazakhstan.

The Editorial Board of the National Academy of Sciences of the Republic of Kazakhstan will monitor and safeguard publishing ethics.
